Flat-Inox-Thermo Series

About us

Vgk Group company produces pvc panels since 2010 in **Northern Greece** in the area of **Xanthi**. Our company has at her disposal a field of **25.000 sqm** that the 4.000 sqm are the offices and the production facilities, with a yearly production capacity of:

Pvc flat sandwich panels: 3.000.000 m²

Pvc decorative panels : 140.000 pcs

Pvc laminated sheets : 1.000.000 m²

In **VGK** we create relations of **co-operation and development**. For this, the Trade section team is fully trained in order to offer you **high-quality services**:

- To organize the **best solution for your transport** costs
- **Technical support** for complex constructions.

According to the specifications of the project:

- We suggest you the **ideal system**
- The **budget of the needed materials** is made
- We propose to you **the best technical solutions**
- We are able to produce different fillings and colors upon customer **special request**

Contact with VGK today make and good use of the advantages of our products and services that we can provide to you. Giving particular accent in the **quality and in the aesthetics**, the company applies Total Quality Management system **ISO 9001: 2000** in every phase of production, where it was also certified in September 2010. All the executives of “**VGK**” remain in the disposal of each customer for his briefing and his service.
